Sorry I missed you Kay (I had to run to the store). I'm actually not too sure the scope of what the field folks want to talk about? They just said some ESA issues have come up for the RRT. Agree we can't get into the weeds too much on the call but I figure we can carry over to another line if need be. How about I give you a ring in the morning? I should know more after our 10am call w our folks in UC and can speak more intelligently (I hope) :). Talk with you soon and thanks,
Gina

Hi Gina

Sounds good. Thanks for the heads up.

We can expand the time frame for the call to accommodate some degree of issue specific discussion. However the forum we have established right now is more for broad situational awareness and info exchange then for issue resolution. We can work to change that or do issue specific meetings if folks desire. We would just want to be coordinated with the UAC in that respect so that we can ensure the right folks are involved in the discussion.

Ma be that is happening already and you are only asking for a report out and issue awareness discussion.

Can you give me a call to discuss a little bit?

Subject: GKM - R8/R9 RRT call tomorrow

Hi All,

Wanted to let you know...during tomorrow's R8/R9 RRT call, Craig and others are going to raise some ESA issues that have come up on the GKM incident. If we run short on time, we can set a follow-up call. Thanks, Gina
